With the new T-smart valve series, GEA Tuchenhausen offers a solution with basic functions – favourably priced and designed for less complex tasks. This valve program includes single-seat, shuttle, tank bottom and double-seat valves. And the quality, of course, meets the well-known high GEA Tuchenhausen standards.

Standardized

The T-smart valve series is characterized by standardized products, while still offering the necessary variations (e.g. body combinations, seals, feedback options). Clearly assigned item numbers simplify the selection and ordering process.

Small and compact

The T-smart valves stand out for their small, compact design. The resulting low weight ensures easy handling and operation of the valve.

Easy to maintain

Due to the innovative bayonet lock and the optimized component concept, the T-smart valve series sets new standards with respect to ease of maintenance. Seals can be replaced in next to no time with just a few turns of the hand. Special tools are not required. The bayonet lock also enables the valve to be dismantled easily without control air.

Technical data:

Valve types: shut-off valve, shuttle valve,
single-seat tank bottom valve, double-seat valve
Material: 1.4404 / 316L (product contacted parts)
Material: 1.4301 / 304 (non product contacted parts)
Sizes: DN 25 – DN 100, 1" OD – 4" OD
Sealing materials: EPDM, HNBR

The benefits at a glance:

- standard configurations
- ease of operation due to bayonet lock
- leakage-free switching double-seat valve
- small and compact
- easy to maintain
